Mr. Bill Burrows
709 Division Street
Gloucester City, NJ
08030-2337

Dear Mr. Burrows:

Thank you for your recent letter concerning long distance reception of WOAY AM.

To answer your questions, our frequency is 860 Khz, 10,000 watts daytime, and antenna height of approximately 600 feet. Being on a Canadian frequency, we recently were given post-sunset and pre-sunrise power of 11.8 watts. We are now on the air from 6:00 A.M. - 10:00 P.M. Our studios and transmitter are located less than one mile south of Oak Hill, West Virginia, and we are affiliated with the Moody Broadcasting Network. There is a sister FM station, WVMA FM which was formerly WOAY FM. The format is religious, or as we prefer to call it, a Christian format, featuring approximately 75% teaching-talk programs, and 25% music.

We receive occasional DX letters, with the farthest to my knowlege coming from Canada. Most come from Pennsylvania.

I do not recall receiving your first request, but for the most part we only answer letters which include a self-addressed stamped envelope. Again, thank you for your letter.

Yours truly,

Gene Ellison
